1 Test Plan Identifier

TP-CBRT-2026-V1.0

2 Introduction

2.1 Purpose

This document defines the scope, strategy, objectives, resources, schedule, and deliverables for cross-browser and responsive testing of a web application.

2.2 Scope

Testing includes:

- Cross-browser compatibility testing
- Responsive layout validation
- UI consistency verification
- Navigation and layout behavior

2.3 References

- IEEE 829 Standard for Software Test Documentation
- Web UI Testing Best Practices
- Assignment Guidelines

3 Test Items

- Homepage
- Login Page
- Product Listing Page
- Product Detail Page
- Contact Page

4 Features to be Tested

- UI alignment across browsers
- Navigation menu consistency
- Image responsiveness
- Layout behavior across screen sizes
- Button and form alignment

5 Features Not to be Tested

- Performance testing
- Security testing
- API testing
- Backend logic validation

6 Test Approach

Manual UI testing will be performed using black-box techniques.

Testing methods include:

- Cross-browser testing
- Responsive testing
- Positive testing
- Negative testing

7 Item Pass/Fail Criteria

- PASS: UI behaves consistently across browsers and devices
- FAIL: UI misalignment or layout inconsistency detected

8 Suspension Criteria and Resumption Requirements

8.1 Suspension Criteria

Testing will be suspended if:

- Application fails to load
- Major UI breakdown occurs

8.2 Resumption Criteria

Testing will resume once:

- Application becomes stable
- Blocking issues are resolved

9 Test Deliverables

- Test Plan
- Test Cases
- Mind Map
- Defect Report
- Test Summary Report

10 Testing Tasks

- Requirement analysis
- Test case design
- Test execution across browsers
- Defect identification
- Retesting

11 Environmental Needs

- Browsers: Chrome, Firefox, Edge
- OS: Windows 11
- Screen Sizes:
 - Desktop (1920×1080)
 - Laptop (1366×768)
 - Tablet (768×1024)
 - Mobile (375×667)

12 Responsibilities

Role	Responsibility
Tester	Execute test cases, identify UI issues
Developer	Fix UI and layout defects
Instructor	Review and evaluate

13 Staffing and Training Needs

Testing will be conducted by one tester with knowledge of:

- Manual UI testing
- Browser developer tools
- Responsive design principles

14 Schedule

Task	Duration
Requirement Analysis	1 Day
Test Case Design	2 Days
Execution	2 Days
Defect Logging	1 Day
Summary Report	1 Day

15 Risks and Contingencies

- Browser rendering differences – Test across multiple browsers
- Responsive issues – Validate multiple screen sizes
- UI inconsistency – Early defect reporting

16 Approval

Prepared By: Mahmuda Islam Rifah

Role: Software Quality Assurance Tester

Date: March 10,2026
